

## General Chart Documentation

### Review Criteria

Medica provider Administrative Manual: medical record management.

**MEDICA®**

#### Question

1. There is a separate, up-to-date problem list documented.
2. The medication list, including OTC's, is updated at the last visit. (It must be clearly evident what medications the patient is currently taking).
3. Immunizations are documented on an immunization record.
4. The presence/absence of allergies/adverse reactions is documented in a consistent, prominent location. If the patient has no known allergies or adverse reactions, this is noted.
5. The visit note is dated and includes the signature and credentials of the provider of service.
